ABOUT US

Shuma Africa is a Consulting Engineering firm that provides holistic consulting services for the Built Environment. Founded in 2006, the company now comprises of a team of skilled, dynamic engineers and technologists who are qualified, proficient and well equipped to provide innovative solutions to infrastructural needs of the African continent as well as international countries. The company prides itself with providing excellent quality services and often surpassing the Client's expectations by ensuring that the services rendered are undertaken in the most cost effective manner without any compromise in quality.

Since its emergence in 2006, Shuma Africa has rapidly developed an exceptional reputation for proficiency, accountability and professionalism, and has continued its growth and experience with civil engineering projects of varied nature and complexities.

Shuma Africa (Pty) Ltd was converted to a private company under the Companies Act of 1973, as amended, after the entity was previously operating as a close corporation.

The name "Shuma" is derived from the African languages verb which means "to work". Shuma Africa aims to work for the African nation by providing the best practices and cost effective solutions towards continent's development. The company's shortened name is "Shuma Africa".

VISION STATEMENT

Shuma Africa aims to become a globally acclaimed consulting firm offering specialist civil engineering services in the built environment.

MISSION STATEMENT

The implementation of our vision is supported by providing:

- best engineering practices with innovative and excellent services.
- consulting services without compromise on quality standards.
- dependable services within the parameters of engineering code of ethics.
- timely services and the most economical designs to the benefits of the client.
- professional services with minimal harm to the environment and without causing major modification to the earth's ecosystems.

OUR VALUES

Shuma subscribes to the globally accepted business norms and standards which are underpinned by the key values as listed.

BBBEE

Shuma is a 100% black owned and a portion of the shareholding is owned by women. We are BEP (Built Environmental Professionals) in terms of the BBBEE construction sector codes of good practice as amended by the department of trade and industry.

WHAT WE DO

The company provides consulting services based on first principle designs, backed up by the computer technology based designs. In addition to engineering designs and studies, the firm recognises the importance of the project management and construction supervision of these projects to completion, and has seek to employ innovative methods and proven techniques to get the job completed on time, within budget, to the highest standard and to the satisfaction of the client.

The company offers the following services:

- Feasibility Studies
- Roads Planning, Roads Rehabilitation and Stormwater Design and Management
- Structural Engineering and Building Services
- Water and Sewerage Infrastructure Design and Management
- Pavement Design, Rehabilitation Solutions and Management
- Water and Waste Water Treatment Solutions
- Water Demand Management Services

CORPORATE SOCIAL RESPONSIBILITY

Shuma is committed to contributing to the socio-economic development. Our objective is to assist in the development of disadvantaged communities and the environment we are working in by contributing to various needs.

By strategically investing in individuals and organisations across communities, we begin to strengthen the very foundation of our societies.

We support charitable organisations on a yearly basis. One of our beneficiaries is Nokuphila School in Tembisa Township. Nokuphila is the flagship school of The Love Trust, a South African Non-Profit Organisation. www.lovetrust.com

We support other previously disadvantaged schools in Limpopo, by buying school uniforms for learners that cannot afford, and contributes towards educational trips. In addition, the company also pays for fees of students that cannot afford tertiary institutions.

ENTERPRISE DEVELOPMENT

Shuma is committed to equipping individuals from previously disadvantaged communities with the means to start and grow small businesses in order to be more self-sustaining. Unemployed individuals are trained as artisans and the company pays for their training fees, transportation, accommodation and food. Small businesses present new employment opportunities and serve as the building blocks of large corporations, hence they are a critical component of the economy. Our future consideration includes the intention to promote Small Enterprise Growth by assisting them through the provision of start-up capital in the form of loans.

SKILLS DEVELOPMENT

We are dedicated to giving our staff the competitive edge to attain, reach and surpass global working standards. We promote skills development to our employees in order to enhance their skills by sponsoring their training at various tertiary institutions. Employees are also sent on short courses for the Continuous Development Programmes.

COMMUNITY EMPOWERMENT

Shuma occasionally recruits unemployed individuals from previously disadvantaged communities and empowers them with knowledge pertaining to Project Management and Financial Management. These individuals are sent for training conducted by qualified and accredited training service providers. Upon completion of training, trainees are awarded certificates to indicate their levels of competencies in the field in order for them to apply for work.

We settle the payments for trainees course fees, transportation, accommodation and food. This gives otherwise disadvantaged individuals the opportunity to fully focus on their training and have a fair chance of being economically empowered.
